Cloud Security Monitoring by Secureworks enables organizations to fortify their cloud defense posture while reducing costs and increasing response speed without adding new headcount. Powered by the Secureworks Counter Threat Platform™, our experts monitor, correlate, and analyze your cloud data sources 24x7 to filter out false positives, identify true security events, and support remediation.

Cloud Threat Visibility

Migrating valuable data and applications to the cloud comes with an increased need for protection against threat actors. Inadequate cloud security during this transition stage exposes you to compliance gaps and vulnerabilities. However, your cloud environment provides a variety of new data sources that enhance threat visibility when monitored correctly with the right people, process, and technology in place. The challenge is hiring and retaining cloud security experts and equipping them with a process and platform to make sense of the volumes of log data on a 24x7 basis. This is a complex task and can leave security gaps especially when neglecting advanced analytics and threat intelligence.

How Secureworks Helps

Secureworks provides the constant visibility needed so that you can transition your organization to the cloud with confidence. Real-time monitoring and visibility pinpoints security events that require your attention and helps you respond quickly to actual threats before damage or exfiltration can occur. Secureworks Cloud Security Monitoring is powered by The Secureworks Counter Threat Platform™ (CTP) and offers easy-to-use reports from The Secureworks Customer Portal that streamline audits and enhances your productivity. We help you eliminate the administrative and maintenance burdens associated with log monitoring so that you can focus on your business priorities and reduce organizational risk as you adopt anytime, anywhere business and productivity tools.

Customer Benefits

- Reduce cloud breach risk with continuous monitoring
- Save time by reducing false positives
- Close costly cloud compliance gaps related to log monitoring
- Free up your staff to focus on strategic responsibilities

Solution Features

- 24x7 monitoring of applications, devices and servers in the cloud
- Powered by The Secureworks Counter Threat Platform for advanced analytics and event correlation
- Elite Threat Intelligence from our Counter Threat Unit™ (CTU™)
- Proactive escalations and alerting
- Single-pane view of your cloud and on-premises threats
- Simplifies compliance with easy reporting
Cloud Security Monitoring for Amazon Web Services (AWS)

Secureworks is an AWS Advanced Technology Partner and industry leading security services provider that monitors your AWS environment for threats 24x7. Powered by the Counter Threat Platform, we collect and analyze data from a variety of AWS log sources and services (e.g. CloudTrail, VPC Flow Logs, Logical Devices, etc.) to ensure you remain protected as you scale up or down.

Cloud Security Monitoring for Microsoft Azure

Receive 24x7 security monitoring, event correlation and advanced analytics of security logs from sources such as Azure Active Directory, Azure Activity Logs, Azure Security Center, NSG Flow Logs and Storage Blobs.

Cloud Security Monitoring for Office 365®

Secureworks provides the 24x7 threat visibility needed to transition your enterprise to Office 365 with confidence. Robust data logging, monitoring, and reporting alert you to threats and unauthorized access to key services such as Exchange Online, SharePoint Online, and Azure Active Directory. We help you achieve better data governance and detect unauthorized users or activity before damage occurs.

Protecting Virtual Firewalls and WAF

In today’s cloud-first environment, virtual firewalls and web application firewalls (WAFs) are key controls to secure your data and applications. They also generate a substantial amount of log data. Enterprises without the staff or expertise to evaluate and assess suspicious data can rely on Secureworks for monitoring, threat correlation, and expertise in AWS and Azure.

About Secureworks

Secureworks® (NASDAQ: SCWX) is a leading global cybersecurity company that protects organizations in the digitally connected world. We combine visibility from thousands of customers, aggregate and analyze data from any source, anywhere, to prevent security breaches, detect malicious activity in real time, respond rapidly, and predict emerging threats. We offer our customers a cyber-defense that is Collectively Smarter. Exponentially Safer™

Amazon Web Services is a trademark of Amazon.com, Inc. in the United States and/or other countries. Microsoft Office 365®, Azure, Exchange Online, SharePoint Online, and Azure Active Directory are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.
