

Remote Information Security Assessment

Focus on identifying gaps in security controls that matter most for your remote business environment

Overview and Benefits

The Remote Information Security Assessment (ISA) provides a flexible [Security Controls Assessment](#) for organizations that want to identify gaps in their existing security controls and drive prioritized corrective action.

Unlike assessments based on industry standards and frameworks, the Secureworks® ISA can be customized to focus on high-risk areas. As your organization pivots and transitions to remote working, this means focusing on the risk and governance aspects of a remote business environment.

Our goal is to provide:

- Access to senior security consultants well versed in security best practice
- A proven framework you can trust and align to
- Prioritized, risk-based recommendations for improvement

Key Features

Our senior consultants bring years of experience, have backgrounds in business and security, and hold multiple industry recognized certifications. Delivered remotely, our consultants assess and map your existing security controls against our proven security framework.

Framework

- Proprietary framework based on security best practice
- Assesses controls for 13 security domains including Business Continuity, Access Control, Asset Management, Incident Management
- Risk-based

Methodology

- Questionnaire sent to collect information on existing policies, plans, standards, and procedures across key domains
- Analysis and documentation of observations and results
- Interviews conducted to complement analysis

Reporting

- Executive summary
- Control-level findings and recommendations displayed in a matrix, prioritized based on risk severity rating
- Delivered within one week

Security Testing

To gain a comprehensive view of your vulnerabilities and gaps in a time of quick transition, complement your Information Security Assessment with a Remote Access Vulnerability Assessment. Our [Secureworks Adversary Group](#) works remotely to help you identify vulnerabilities and reduce the attack surface created by new and expanded remote access infrastructure.

About Secureworks

Secureworks® (NASDAQ: SCWX) is a leading global cybersecurity company that protects organizations in the digitally connected world. We combine visibility from thousands of customers, aggregate and analyze data from any source, anywhere, to prevent security breaches, detect malicious activity in real time, respond rapidly, and predict emerging threats.
